

MODEL VU-LP-200 AUTOMATIC LOOPING MACHINE

VU-LP-200 全自动线圈缠脚机

The VU-LP-200 is an up-to-date model of high quality and considerable value. It is designed for toroidal coils leading wire looping machine. This machine fill in the gaps about coils assembling plastic case and looping automatically. VU-LP-200 is fit for many kind of transformer and inductance production etc. Meanwhile, it has simple operation and speedy maintenance etc multifunction. And it has proven to be the optimal choice in automatical leading wire looping machine.

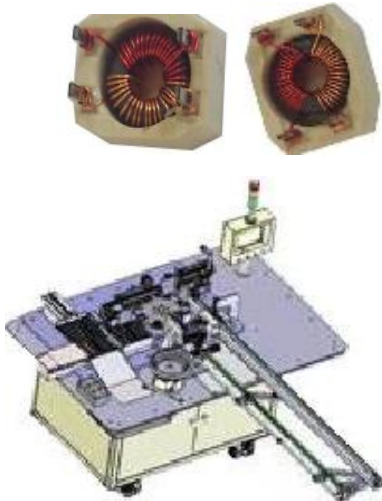

VU-LP-200 全自动线圈缠脚机是本公司研发生产的新款机种。此款缠脚机填补了磁环线圈类产品装配胶壳缠脚自动化解决方案的空白，是针对批量变压器类、电感类，磁环、胶壳装配缠脚最新研发的全自动机型，具有节省大量人工，性能稳定及维修便捷、快速等特点。为自动引线缠脚机的最佳选择。

TECHNICAL DATA/技术数据:

Power 电源	Single phase 单相 220V 50/60HZ
Exhausted power 耗费电力	3 KW
Weight 机台重量	150kg
Size 机台尺寸	1300×900×1100mm

Production sample 产品样品:

参考机器图 /Reference drawing

MACHINE FEATURES 机器特点

- Machine base 主体介绍:
Machine base with steel plate sprayed with plastic, perfect rigidity, steady operational mode, Safty shield with industry section aluminum and organic glass
机体下面部分为钢板喷塑，刚性好保证运行平稳，上面部
分为工业铝型材及有机玻璃材料制成，上部带透明防护罩。
- Controller 控制器:
PLC controller system
PLC控制器系统。
Operation system with Chinese language, and password access control system
简体中文操作，带密码权限管理功能；
- Function 功能:
setup winding turns, winding direction, winding speed, production qantity, original winding point, original winding angle, optional automatic setup mode and manual setup mode.
可设置缠绕圈数，缠绕方向，缠绕速度，产品数量，起绕点，起绕角度。可选自动模式，手动模式。
- Display 显示器:15" LCD display 15寸显示器
- Mainshaft 主轴:
Stepper motor 步进马达
- Pneumatical system 气动系统:
SMC pneumatical cylinder SMC 气缸
- According production request.design tooling and adjust looping turns
根据产品工艺要求，定制专用载体模具灵活调整缠脚圈数
- Looping precise and smooth
缠脚精确、平整
- Settle and cutting needless leading cooper wire automatically
自动整理、切除缠脚多余铜线
- Settle shaping automatically
自动整型
- Loading and unloading automatically
自动上料及下料
- Efficiency 效率: 3-4S/PCS
